Dated: 09 December, 2020

**Mr. Zahid Abdullah
Information Commissioner,
Pakistan Information Commission,
1st Floor, National Arcade, 4-A Plaza,
F-8 Markaz, Islamabad**

**RE: CANTONMENT BOARD CLIFTON'S REPLY TO APPLICATION UNDER RIGHT OF ACCESS TO
INFORMATION ACT, 2017**

Dear Sir,

The Public Interest Law Association of Pakistan (PILAP) is a public interest association registered under the laws of Pakistan and is concerned with addressing issues of public interest in accordance with the Fundamental Rights guaranteed by the Constitution of Pakistan. Our organization requested information from Cantonment Board Clifton (CBC) on a proposed development project planned along a stretch of Seaview Beach, Karachi. The request was made under the Right of Access to Information Act, 2017 through an Application ("RTI Application") dated 6th July, 2020 (attached for your reference). Not having received a response within the 10 working day time period stipulated by the 2017 Act, PILAP then submitted an appeal for non-provision of information with your respected office. Thereafter, at the instigation of the Pakistan Information Commission ("the Commission"), CBC supplied the Commission with a letter dated 24th August, 2020, received at our office on 26th October 2020 via letter dated 15th October, 2020 from the Commission. CBC's letter ostensibly responds to PILAP's questions in its RTI. PILAP, not being satisfied with the response from CBC, submits as under:

1. That PILAP's RTI application dated 6th July, 2020 relates to a proposed development project along a stretch of Seaview Beach, Karachi, planned to be undertaken by CBC. Given the fact that the project is planned along the coast and would involve land reclamation, it will impact the water quality, marine life and the ecosystem along the coastline. The project would also generate large amounts of waste, during and after construction. In an article published in Dawn on 5th July, 2020, a Senior Director at World-Wide Fund for Nature-Pakistan is quoted to have said that the project is "a recipe for an ecological disaster as large concrete structures along the coastline have shown to impact sea's hydrological dynamics, causing loss of natural land and increasing the risk for erosion and vulnerability to inundation. They also magnify the impact of extreme weather events and natural disasters." The article further quotes

Dr. Asif Inam, former Director-General of the National Institute of Oceanography, saying that "Clifton beach is experiencing rapid sedimentation of the material dredged from KPT's Deep Sea Container Terminal, and that any structure along the Clifton beach would obstruct the naturally occurring process of longshore sediment transport from the West of Clifton to the East, thus resulting in accumulation of sediments on the western side and erosion on the eastern side of the structure."

2. That the Sindh Environmental Protection Agency (Review of Initial Environmental Examination and Environmental Impact Assessment) Regulations, ("2014 Regulations") provide in Regulation 4 that "*a proponent of a project falling in any category listed in Schedule-II shall file an EIA (Environment Impact Assessment) with the Agency (SEPA).*" While Regulation 3 provides that "*A proponent of a project falling in any category listed in Schedule-I shall file an IEE (Initial Environmental Examination) with the Agency.*" It is apparent from a perusal of Schedule II that "large scale public facilities" fall within clause I (4) of the said Schedule. The facilities at the proposed development project are to include "two beach decks, a jogging track, fountains, monuments, restaurants and tuck shops, hawkers and streets stalls, a children's play area, two public piazzas of 2.5 acres each, green areas spread over 13.5 acres and watchtowers" (Dawn, 5th July, 2020). It, therefore, has all the features for "large scale public facilities" and requires an EIA. The project also has the potential to fall within clause K (2) of Schedule II as it is a "*project likely to cause an adverse environmental effect.*"
3. That as per section 18 (1) of the Sindh Environmental Protection Agency, 2014, "*All provincial government agencies, departments, authorities, local councils and local authorities responsible for formulating policies, legislation, plans and programmes to be implemented in Sindh province which may cause any environmental impact in the jurisdiction of the province shall, before submitting the same to the competent authority for approval, forward to the Sindh Environmental Protection Agency a strategic environment assessment.*" CBC, being a local authority, and the proposed project having the potential to cause environmental impact in the jurisdiction of Sindh province, the question arises as to why a Strategic Environment Assessment (SEA) has not been conducted.
4. That scrutiny of the proposed development project is a matter of public interest. It involves a potential adverse impact upon the environment and hence requires public participation under the Environment Impact Assessment (EIA) review process. It also impacts Fundamental Rights under the Constitution. The Supreme Court of Pakistan has ruled that the right to life under Article 9 of the Constitution encompasses the right to a healthy environment. Further, under the Public Trust Doctrine, the state is

obligated to hold public resources, such as coastlines, on trust for the enjoyment and use of the public. Therefore, public participation in any development activity that affects the environment is essential, as is the requirement for fulfilling regulatory provisions.

5. That in its response to PILAP's RTI application dated 6th July, 2020, via Appeal No. 458-08/20 CBC has provided a copy of an NOC issued to it by SEPA in response to an Initial Environmental Examination (IEE) conducted by CBC for the proposed development project in question. CBC has also, very helpfully, attached a copy of the IEE conducted by it.
6. That in view of the above discussion and CBC's response to PILAP's RTI, PILAP seeks the following information from CBC:
 - i) Why has an EIA or SEA not been conducted for the proposed development project along the stretch of Seaview Beach, Karachi?

Thank you.

Yours Sincerely,

Public Interest Law Association of Pakistan (PILAP)
Through its Chief Executive Officer
Pervez Said
